

## DOES TRUMP REALLY HAVE THE BIGGEST DICK IN THE RACE?

This may sound like yesterday's question.

Now that Marco Rubio has apologized for suggesting not only that Donald Trump may have wet his pants but also that his dick is undersized (like his "small hands"), the most recent Republican debates have turned to more respectable issues such as immigration and ISIS. But my title question has so far been answered only by Trump himself, who "guaranteed" the size of his endowment at the start of the Republican debate on March 3. Since at least some of Trump's guarantees have been challenged by the state of New York, which is suing Trump University for making false claims to more than 5,000 people, should we not ask for something more?

Yes indeed, I'm asking for the full Monty. Why not?

Given his unbounded faith in his omnipotence, his power to make America great again, to destroy ISIS at a stroke, to expel 11 million undocumented immigrants, and to compel Mexico to build a gigantic wall (50 feet high?) all along the nearly 2000 miles of our common border, Trump clearly aims to be not just president of the United States, but its first king—perhaps even the first king of the western hemisphere. So why doesn't he follow the example of the kings of Cameroon, who—in the nineteenth century at least—were sometimes sculpted standing in the nude with their ample appendages plainly on show? (To see what I mean, go to this page [<https://quizlet.com/109192351/three-figures-from-cameroon-flash-cards/>], scroll down, and check the left side of the page.)

Admittedly, Trump is not likely to drop his pants in public. But in asking us to judge the size of his dick as part of his qualifications for the highest office in the land, he is implicitly taking an African king as his role model. Which is wonderfully ironic on two fronts. First, Trump loathes all non-Americans, except of course for the Russian ladies whom he periodically marries (and who thereby prove that immigrants will take jobs no American will do); second, the African-American president

whom he is campaigning to succeed is one of the most cultivated, eloquent, and sophisticated presidents we have ever had—the antithesis of Trump himself.

In any case, if Trump wins this election, I predict that he will immediately mount a series of erections: first a 2000 mile long wall rising 50 feet along the Mexican border, and then a wall of equal height along the Canadian border—to keep millions of Americans from fleeing his reign.
